Quick dry foam technology

No one likes wet cushions! That's why we use quick dry foam that allows water to drain out of the cushion quickly and is also resistant to mould growth.

Heavy duty aluminium frames

OceanWeave furniture uses marine grade 1.6-2.0mm powder coated aluminium framing. Designed for heavy commercial use - these frames will not rust or bend.

Sunbrella Fabrics

Cushions are covered with Sunbrella which are the global market leaders for outdoor fabric. They offer a 5 year warranty against fade, rot and material breakdown. They are colourfast, water resistant, stain resistant and washable.

3 year commercial warranty

You are covered by a comprehensive back-to-base 3 year warranty on furniture & cushions. The Warranty covers faulty workmanship and failure of materials under normal conditions of use and maintenance. Excludes normal wear and tear.
